

Find the Fourier transform of the function $g(t) = \begin{cases} 2, & -3 < t < 1 \\ 0, & \text{otherwise} \end{cases}$. [105 南大電機 7]

$$[\text{解}] \int_{-\infty}^{\infty} g(t) e^{-i\omega t} dt = \int_{-3}^{1} 2e^{-i\omega t} dt = \frac{2}{-i\omega} \cdot e^{-i\omega t} \Big|_{-3}^{1} = \frac{2}{-i\omega} (e^{-i\omega} - e^{i3\omega})$$
